domestic circuit protection

The Need To Know

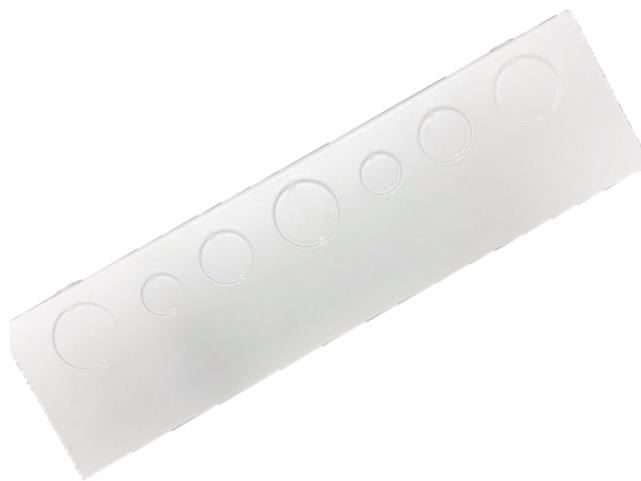

Cable Clamp 01

Incoming meter tails can be safely secured with a single screw, thereby preventing stresses caused from the installation on the mains switch. This feature comes as standard with every consumer unit.

Knockout system 02

Large oval knockouts spaced perfectly across the rear of the consumer units to provide great access for cabling.

Top & Bottom entry 03

Good number of 20mm, 25mm and 32mm knockouts on the top and the bottom of each consumer unit

Grommet strip & plate 04

FREE grommet strip is provided with each consumer unit to ensure each of your installations can be completed to the safest standards.

VCP Cable entry Solutions for all of our whole VCP Smart Design 1.0 range with round knockouts.

Your VERSO Solution:

When it comes to cable entry into the Smart Design 1.0 Consumer units we have thought of all the solutions that aid the installer ensure that the integrity of each cable is not compromised and that each installation is quicker and easier to complete.

Each Design 1.0 comes factory fitted or supplied with:

- A Cable Clamp
- Large rear oval knockouts
- Vast arrangement of 20mm, 25mm & 32mm knockouts
- Grommet strip and entry plate
