VERSO[®]
domestic circuit protection

The Need To Know

Lockable 01

Our optional lock is an elegant solution to enable temporary locking. Our cleverly engineered lock pilot comes with the board and our VCPK-L slots into the lid with ease.

Added Height 02

The VCPD1.0 range has an increased height to the standard UK size. Now standing 260mm tall, it allows for far greater installation space.

Overcurrent Protection 03

All factory fitted SPD consumer units come complete with dedicated pre-wired 32A MCBs as overcurrent protection as recommended.

Ferruled connections 04

All pre-wiring has been completed with ferruled terminals to ensure the quality of connection and ensure no fraying is possible.

VCP Smart Design 1.0 is aesthetically, functionally and safer to use on every installation.

Your VERSO Solution:

Available from 2 to 22 ways and lockable from every size as standard to ensure compliance and additional safety. The Smart Design 1.0 is pack full of installation and safety features from the ones highlighted to the list below:

- Robustly built
- Tamper proof earth
- Full range of accessories
- Factory fitted spirit level
- Free Gland plate
- Free grommet strip
- Factory fitted tail clamp
- Factory fitted SPD versions (with factory fitted OCP)

Designed in the UK to specifically provide the installer with the perfect consumer unit for rewires, replacements or new build projects.
